**Briefly**  
**Mindanao exploration**  
AS the Malampaya natural gas field is drying up, Mindanao might have the indigenous energy resources to energize the country.  
In a webinar of Davao International Conference 2021 Thursday, PNO Exploration Corp. (PNO EC) vice president for upstream operation Jaime Bacud said Mindanao is rich in indigenous resources that can support the country's energy requirement.  
Bacud said Mindanao alone has three sedimentary basins waiting for exploration for oil and gas resources.

**Female farmers**  
FEMALE FARMERS are hindered by land titling issues and unequal pay, which must be addressed if production is to improve, agribusiness executives said.  
Cherrie D. Atillano, AGREA Philippines chief executive officer, said in an interview that land distributed under the agrarian reform program is usually titled in the name of the husband and the wife.  
"It should not be the case. The land title should be in the name of both the husband and the wife," Ms. Atillano said.

**SUSTAINABLE FISHING.** Local fishermen in Surigao City were sighted from afar using rods and reels which are vital to ensure sustainable fishing.

**NEA releases P455-M loans to electric coops**  
By MYRNA M. VELASCO, Contributor  
WITH typhoons aiming their blows on the country again, the National Electrification Administration (NEA) announced that it has been accelerating the release of loans to the country's electric cooperatives (ECs), including calamity loans that they can use in the repair of their facilities.  
Within January to August this year, the government-run electrification agency reported that the magnitude of loans released to ECs already hovered at P455.293 million.  
As culled from NEA's Accounts Management and Guarantee Department (AMGD), the bulk of the extended loans amounting to P380.293 million had been cornered by 16 electric coops. The amounts were mainly earmarked for their capital expenditure (capex) projects as well as working capital requirements.  
Of the calamity loans approved for the power utilities, NEA emphasized that six electric cooperatives availed of at least P75-million.
